

Kevin Dewalt

15+ years driving software innovation in start-ups, large companies & government

50+ startups as founder, investor or advisor

Financial Services, Intelligence, Life Sciences, Consumer Web, Telecom, Health Care

Kevin M. Dewalt is a technology entrepreneur in Arlington, VA. He is an authority on new product innovation, having held roles in hands-on engineering, fundraising, sales, and market development.

As an Entrepreneur-in-Residence to the National Science Foundation he mentored dozens of startups, was a co-instructor at NSF's iCorps program and held startup workshops at **MIT, Stanford, and Carnegie-Mellon**.

As a strategic investor for the US Government, Mr. Dewalt helped make over \$20M of venture investments in 25 start-ups & helped deploy the technologies to the federal market.

As a founder of 3 startups - ManyWheels, auto logistics service, ClaimAway, consumer finance healthcare, and Soapbox.com, consumer web subsidiary incubated at **The Motley Fool** – he secured \$2M+ funding and brought new products to market.

He began his career as an engineer & project manager with the **US Coast Guard** and at FINRA where he ran a worldwide engineering team regulating **NASDAQ Stock Market**.

Mr. Dewalt received a BS in Electrical Engineering as the #1 graduate from the **US Coast Guard Academy** and an MS in EE from **Stanford University**.

He also an active leader in driving innovation as:

- Board member of **SENS Foundation**, funded by **Peter Thiel** to develop regenerative medical solutions to the diseases of aging.
- Investment panel reviewer for the National Science Foundation.
- Blogger, speaker, and event organizer supporting the start-up ecosystem in the Washington DC metro region.

Although his lifelong ambition is to play professional golf – a dream cut short at birth by an utter lack of talent – he still plays the game regularly with his wife in Arlington.
